- Spring lever action — pressure release
- Silicone base pads
- Audible timer, adjustable from 1 to 60 seconds
- 110 volts or 220 volts operation
- Six-month guarantee on working parts.

MODEL 674

MODEL 674 SEALOMATIC

This all around work horse is ideal for shirt printers. The 674 features a large 14 x 16 platen with a raised table for extra work space. No fear of burning yourself while placing designs and lettering on this machine because the heat assembly lifts completely out of the way. The doubled lever action gives you up to 2500 lbs. of platen pressure cutting application time on many transfers. The machine is surprisingly easy to operate because of the lever system and spring release. A larger 16 x 20 version is available in our model 674A.

120 v. 12.5 amps. or 240 v. 6.3 amps. 26D x 23W x 12½H wt. 59 lbs.

MODEL 674A SEALOMATIC (Not Pictured)

Combines all the features of the 674 with a larger 20" deep x 16" wide heat assembly and base platen.

110 volts 25 amps., 220 volts 12.5 amps. 28D x 24½W x 12½H Wt. 90 lbs.

MODEL 674S

MODEL 674S SUPER SEALOMATIC

... this one has it all!

Heavy duty construction with raised work table and open back makes it easy to slip soccer shirts or mesh jerseys onto the 674S. The super sealomatic is also ideal for jackets and collar model garments. Interchangeable two position 14" x 16" base platen with Teflon cover over pad makes it easy to slide garments on and even easier to remove transfer residue when imprinting mesh jerseys. The 14" x 16" base platen rotates for handling smaller size garments and is interchangeable with an even smaller 10" x 12" base to accommodate children and youth sizes.

25½D x 24½W x 12½H wt. 88 lbs.
